Dear Sirs:

SUBJECT: TENTATIVE ORDER NO. R9-2004-001 (NPDES No. CAS0108766), *Waste Discharge Requirements for Discharges of Urban Runoff from the Municipal Separate Storm Sewer Systems (MS4s) Draining the County of Riverside, the City of Murrieta, the City of Temecula and the Riverside County Flood Control and Water Conservation District within the Santa Margarita Watershed*

Enclosed is a copy of tentative Order No. R9-2004-001 dated May 7, 2004. This draft of the tentative Order was prepared after carefully considering all the comments received during the public comment period. The San Diego Regional Water Quality Control Board (SDRWQCB) appreciates your comments and suggestions for revisions of tentative Order No. R9-2004-001. Although we did not concur with all suggestions, we have made several modifications to the tentative Order and Monitoring and Reporting Program in response to your concerns. The noteworthy changes include, but are not limited to:

- Extension of time to revise grading ordinance from 6 months to 1 year;
- Significant reduction in receiving water monitoring requirements to the essential equivalent of your proposal;
- Deletion of requirement to review industrial storm water monitoring data during inspections; and
- Revision of section H.3 (Residential Programs) to allow more flexibility in prioritizing target areas and activities.

May 7, 2004

Also enclosed are copies of the revised Fact Sheet/Technical Report and the Response to Comments document. Revisions to the Fact Sheet/Technical Report were made to clarify the document in response to comments received. Explanations for the revisions to the tentative Order, the Monitoring and Reporting Program and Fact Sheet as well as the explanations for recommended changes that were not made are contained in the Response to Comments document.

Please contact Megan Quigley, at 858-268-5363, with any questions regarding this letter, the attached documents, or the SDRWQCB meeting.
